

OUTWOOD ACADEMY
Family & Community Support

Our Vision

We are always working towards our vision which is segmented into five strands.

Our Family and Community Support Strategy continues to put children first by bringing families and communities together.

To support transition into school throughout the early years.
To support children and families who are new to school in any year group and at any point throughout the year.

To create a love of reading that supports children in their confidence and development of reading skills.

To have access to a central bank of high quality resources that support families within their home environment.

To help parents and carers to build confidence in supporting their child to achieve throughout their school life.

To support parents and carers on their journey back into work/volunteering/training.

“Our schools at the heart of the community and the community in our hearts”
